

Monday 22nd February 2021.

WALT: *measure objects by height or length.*

Today we are exploring measure. How tall are you? Can you find two objects that are taller than you and two objects that are shorter than you? Take a photo of you standing next to these things. You could try doing the same for members of your family. What is taller than your grown up? What is shorter than your brother or sister?

The pole is taller than me.

The trolley is shorter than me.
